Dear Mr. Peter,

My name is Bhavika Agarwal and I am a First-year undergraduate student at the University of Warwick. I am currently doing a BSc Economics degree. I am writing this application to apply for the role of Fintech Advisory Analyst.

I not only aspire to excel in the field of finance, but also desire to learn, grow and assist in the entire process. I am a firm believer of the Global Growth Market's future potential. I will be honoured to be a part of such an intellectual community and gain knowledge from experienced people. The opportunity to be mentored from the senior constants will be a golden opportunity for me to gain real life experience and improve my knowledge about the markets and gain real life experiences.

I am fascinated by the dynamic nature of the Financial Markets. I am also a tech savvy and I am willing to learn about the influence of technology in the financial market. By the end of the program I will be able to gain essential skills which will allow me to grow as an individual and prosper in this field. I have skills that are perfect match for the role. I have interned in Asset Management firms like Fidelity International and therefore I have the knowledge about the industry. I am currently part of many societies on campus which include my role as the treasurer for the Warwick Risk Management Society and I am also part of the investment team of the Warwick Asia Careers society. Such roles have not only improved my knowledge about the financial markets, but it has also improved my communication and networking skills. Working as an analyst for the Warwick Business School, I have learnt to pay attention to details and gained an analytical approach about data visualization. Altogether I am very hardworking, and I believe I will be able to do justice to the role.

Thank you for going through my application and I hope you consider me as a strong candidate.

Yours Sincerely,

Bhavika Agarwal
