University of Warwick

Dear Mr. David,

My name is Bhavika Agarwal and I am a First-year undergraduate student at the University of Warwick. I am currently doing a BSc Economics degree. I am writing this application to apply for the role of Sustainability Engagement Intern.

I had a huge aspiration to study at Warwick University and now that I am studying here, I want to give back to this amazing community. I am an eco-centric person and I believe that sustainability should be one of the most crucial aspect in any community. The Sustainability Hub of Warwick University which included projects like Warwick nest inspired me to be a part of this noble deed. I have deep interest in environment related issues and I want to use my holistic approach to make Warwick University one of the most sustainable campus in UK.

I have the right skill set to achieve this goal. I have done a two-year course on Environmental Systems and Societies for my International Baccalaureate Program. This course has equipped me with the technical knowledge and has given me a holistic view about the environment. Moreover, my passion for the environment made my start my own Non- Profit Organization- "Clean Addicts". As a part of this, I organized many campaigns to spread awareness about cleanliness in India. The campaigning included marketing the event as well as liaising with the local government and press to spread more awareness. I have visited the local forests and villages of the Nilgiri Range in India where I learnt about sustainable use of timber. I also motivated the localities to keep their surrounding clean by campaigning in the local streets. Moreover, I am currently part of many societies on campus which include my role as the treasurer for the Warwick Risk Management Society and I am also part of the investment team of the Warwick Asia Careers society. Such roles have improved my communication and networking skills. It has also improved my organization skills as I have to present my work to my other team members. Working as an analyst for the Warwick Business School Society, I have learnt to pay attention to details and gained an analytical approach about data visualization. Altogether I am very hardworking, and I believe I will be able to do justice to the role and make University of Warwick more sustainable.

Thank you for going through my application and I hope you consider me as a strong candidate.

Yours Sincerely,

Bhavika Agarwal
